• Product Description

A general use line boring machine for contractors concerned with maintaining their own equipment. The Cadet features a bi-directional adjustable feed speed with rapid traverse. This is a value packed machine with all the features you would expect but at an affordable price. Ideal for servicing small fleets, the cadet will reduce your heavy equipment downtime and allow you to schedule repairs to suit your needs.

• Advantages

- Excellent value and features
- Works with all 4-14 options
- Bar speeds that work with high speed steel or carbide
- Light weight and durable
- Can be used horizontally, vertically or in any position
